**IMPLEMENTING SRMS ENABLES TO DEMONSTRATE BEST PRACTICE TO CUSTOMERS.**

## **What is ISO 30000 ?**

ISO 30000:2009 specifies requirements for a management system to enable a ship recycling facility to achieve safe and environmentally sound ship recycling operations in accordance with national and international standards.

### **The Process:**

- Accepting a ship for recycling by the facility;
- Assessing the hazards onboard the ship;
- Identifying and complying with any applicable notification and import requirements for ships to be recycled;
- Carrying out the recycling process in a safe and environmentally sound manner; conducting required training; ensuring the availability of social amenities (e.g. first aid, health checks, food and beverages);
- Storage and processing of materials and wastes from the ship; waste stream and recycling stream management, including contractual agreements; and documentation controls for the process, including any applicable notification of the final disposal of the vessel

### **Who can implement ISO 30000 ?**

ISO 30000:2009 is applicable to any ship recycling facility.

### **BENEFITS of implementing ISO 30000, is that this standard**

1. DWT (Dead weight tonnage) of the ship is recycled and disposed in environmentally sound and safe manner with due consideration to Safety
2. A powerful marketing tool at national and international levels.
3. Have an international formal management system to manage business.

## Steps to certification:

- 1) Contact us and we can informally advise you of the options to suit your needs.
- 2) We will submit an estimate of your costs for training or certification to meet the requirements of certification to BCMS.
- 3) A formal application for certification is submitted with due acceptance.
- 4) Auditing team appointed
- 5) Document Review conducted.
- 6) On site auditing conducted with 1<sup>st</sup> and 2<sup>nd</sup> stages.
- 7) On successful audit, a certificate of registration of verification/compliance is issued which identifies the management system scope.
- 8) Continual Improvement by way of Surveillance Audits on site audits to ensure you continue to meet the requirements of BCMS.
